

**What else can I do  
to save energy?**

**Switch off your  
computer monitor at night  
it saves enough energy to  
print 800 sheets of paper.**

**Replace** light bulbs with low energy ones.

If everyone changed 1 bulb in the UK we would save the same amount of energy made by a power station.

**Turn off you TV.**

**TVs left on standby waste  
£50,000,000 of electricity  
each year in the UK.**

**Only boil the water you need.**

**If we all did this we would save  
enough energy to light up 3/4 of  
Britain's street lamps each year.**

**Use Renewable energy.**

**Some ways to make energy are  
much cleaner than others  
e.g. solar / wind /  
hydroelectric.**
